WACONIA

WACONIA MANUFACTURING, INC.

Make Your Facility More Efficient And Profitable.

Incredibly efficient, high-volume railcar receiving.

Totally-enclosed truss protects material from the elements.

Galvanized rain covers keep Mother Nature at bay.

User-friendly technology & environmentally-friendly facility.

Holding tower & blend tower each have separate lanes.

Railcar gate opener & large-volume rail hopper

Hopper, conditioner and belt conveyor in below-grade concrete pit.

Two TA-Series vertical blenders in a Waconia Tower.

Belt conveyor with tripper discharges to bin of choice.

Large volume, stainless steel hopper with heavy-duty drive over grate.

Easy-to-access material conditioner mounted below hopper.

Totally-enclosed conveyor transfers conditioned material to leg.

Multiple discharge lanes. Electric, telescoping dust spouts.
